3rd international symposium on resilience research
Mainz, Sept 27-29 2017

Wednesday, Sept 27

Intresa business meeting
10:00

Scientific program:

13:00	**Welcome** (R. Kalisch, B. Lutz, M. Wessa)

Session 1: Animal models of resilience and neurobiological mechanisms

13:15	**Keynote: Scott Russo**, Mount Sinai School of Medicine, New York *Immune mechanisms of stress susceptibility and resilience*
14:15	**Thomas Larrieu** , Ecole Polytechnique Fédérale de Lausanne *Predictability of susceptibility and resilience to chronic social defeat stress: a behavioural origin ?*
14:45	Coffee
15:15	**Bo Li**, Cold Spring Harbor Laboratory *Amygdala circuits in the regulation of divergent behaviors*

Young investigator short talks

16:15	Selected poster abstracts

Spotlight on the hippocampus

16:45	**René Hen**, Columbia University, New York *The ventral hippocampus: a key player in resilience and mood*

Poster session

17:45 – 19:00	with Wine & Cheese
20:00	Speakers' dinner

Thursday, Sept 28

Session 2: The dynamics of human resilience

9:00	**Keynote: George Bonanno**, Columbia University, New York *Loss, trauma and resilience: From heterogeneity to flexibility*
10:00	**Angelique Cramer**, Tilburg University *Vulnerability and resilience from a complex systems perspective*
10:45	Coffee
11:15	**Birgit Kleim**, University of Zurich, and **Raffael Kalisch**, DRZ *Is resilience predictable?*

Poster session

12:00	with Lunch

Session 3: Early-life stress

13:30	**Keynote: Isabelle Mansuy**, University of Zurich *Transgenerational effects of early life trauma: Epigenetic mechanisms involving the germline*
14:30	**Aniko Korosi**, University of Amsterdam *Early-life stress induced cognitive decline: focus on nutrition and neuroimmune functions*
15:15	Coffee
15:45	**Anne-Laura van Harmelen**, Cambridge University *Mental health resilience after child maltreatment*

Young investigator short talks

16:30	Selected poster abstracts

Spotlight on Extinction

17:00	**Keynote: Kerry Ressler**, Harvard University *Genetic and neural circuit approaches to understanding extinction and inhibition of fear*

Gutenberg Social

18:30	Drinks, food, music and a look at the world's first printed bible (ticket available on site, 15 €)

Friday, Sept 29

Session 4: Extinction and inhibition of fear

9:30	**Keynote: Michelle Craske**, University of California Los Angeles *Clinical approaches to understanding extinction and inhibition of fear*
10:30	**Sevil Duvarci**, Goethe University Frankfurt & **Anna Gerlicher**, DRZ *Dopaminergic mechanisms of fear extinction*
11:15	Coffee
11:45	**Conor Murphy**, University of Innsbruck *The role of microRNAs in fear extinction*
12:30	**Young investigator poster award ceremony** **Conclusions and Farewell**
12:45	Lunch
14:00 – 16:00	CRC1193 business meeting In paralel: PhD student and postdoc meeting
