PROGRAM

International Orbital Symposium

Dear colleagues,

it is our pleasure to invite you to Mainz to participate in a one day "update" on orbital diseases covering medical and surgical management. An international and interdisciplinary faculty will present state of the art lectures on the most important orbital pathologies, including inflammatory and neoplastic lesions. It is our aim to provide useful clinical strategies how to deal with these multifaceted and often challenging disorders.

The meeting will provide a platform for interactive discussion. It addresses ophthalmologists both in training, and fully trained ophthalmologist with an interest in orbital diseases as well as orbital surgeons.

For those with a specific interest in Graves' orbitopathy, there is the possibility to extend the stay and attend the subsequent one day EUGOGO teaching course on Graves' ophthalmopathy (for further details see www.eurothyroid.com) from 28th to 29th of September, to be held at the same institution.

We are looking forward to welcoming you in Mainz.

With kind regards

Prof. Dr. med. Norbert Pfeiffer

Prof. Dr. med. Susanne Pitz
