

## INTERNATIONAL SYMPOSIUM

Organized by the Collaborative Research Center 548 (SFB 548)  
“Analysis and Modulation of Allergic and Autoimmunologic Diseases“

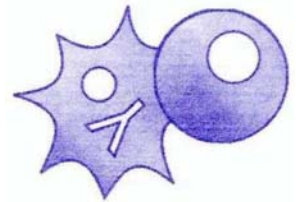

# FRONTIERS IN ALLERGY AND AUTOIMMUNITY

May 30 – 31, 2008

Johannes Gutenberg-University Mainz

### Confirmed Speakers and Topics

- Richard Blumberg, Boston** CEACAM1 as a Regulator of T Cells  
**Shohei Hori, Yokohama** Foxp3 and its Essential Function for T Cell Regulation  
**Dietrich Kabelitz, Kiel** Regulatory T Cells and Toll-Like Receptors  
**Hajime Karasuyama, Tokyo** Role of Mast Cells and Basophils in the Development of Allergic Diseases  
**Bart Lambrecht, Rotterdam** Dendritic Cells in Asthma: Opportunities for Novel Treatment in Asthma  
**Josef Penninger, Wien** T Cell Regulation and Autoimmunity  
**Klaus Rajewsky, Boston** Topic To Be Announced  
**Gerold Schuler, Erlangen** Immunoregulation by Dendritic Cells  
**Mark Shlomchik, New Haven** B Cells in Autoimmunity  
**Warren Strober, Bethesda** New Insights into the Pathogenesis of Inflammatory Bowel Diseases  
**Harald von Boehmer, Boston** Therapeutic Intervention with Regulatory T Cells

**Location:** Lecture Hall, Department of Dermatology, Johannes Gutenberg-University Mainz

**Language:** The official language of the symposium is English.
