

Disclaimer PASSOS Software (English version)

1. The PASSOS software is a software for the estimation of possible late effects of ionizing radiation after radiotherapy for breast cancer. Late effects are radiation-induced cancer and heart disease independent of the primary tumor that could occur, for example, within 15 years after radiotherapy or by age 80. Due to the stochasticity of biological processes, only theoretically estimated probabilities can be given for late effects.
2. The software is aimed at experts for supportive assessment of exposures applied by radiotherapy.
3. Scientific research and the underlying data sources change continuously. The models, methods and data sources implemented in the PASSOS software may be outdated, incomplete or incorrect. An update of the software may lead to changes in the risk estimates, which may also be substantial. The user has to ensure that the latest software version is installed.
4. The user is aware of the circumstances described under 3. and the resulting risks when using the application and exploiting its results. Due to the research character of the software, the Licensor (Helmholtz Zentrum München, Ingolstädter Landstr. 1, 85764 Neuherberg, Deutschland) does not assume any warranty that the results of its use or the transmitted information can be used for a specific purpose or commercially exploited and are free of third-party property rights.

In the event of a breach of material contractual obligations, i.e. obligations which are essential to the proper performance of the contract and which the user may regularly rely on being complied with, the Licensor shall be liable for intent and any negligence, but in the case of simple negligence limited to the foreseeable damage typical for the contract.

Otherwise, the Licensor shall only be liable for intent and gross negligence. In case of gross negligence, liability for indirect and consequential damages is excluded.

The aforementioned limitations or exclusions of liability shall also apply to the liability of the respective partners of the Licensor, for its employees, bodies, representatives and vicarious agents as well as for their personal liability.

The above limitations or exclusions of liability shall not apply in the event of injury to life, limb or health or in the event of claims under the Product Liability Act.
5. Under no circumstances should a decision regarding radiation therapy be made solely or primarily on the basis of the estimates of the PASSOS software. An overall assessment by the treating physicians is absolutely necessary, which compares the immediate benefit of a therapy with the possible late effects.
6. The software is provided free of charge.
7. This disclaimer is provided in both German and English. The German version shall prevail, in particular in matters of interpretation and in the event of inconsistencies.
