1st International Symposium

on Endovenous Abolition of Saphenous Vein Reflux with Cyanoacrylate Adhesive

Dear colleagues,

twelve years after the introduction of endovenous laser treatment to Germany, we will meet at the same place to discuss the latest innovation in the field of saphenous vein reflux abolition: Endovenous Cyanoacrylate Adhesive.

With a „no-tumescent-no-compression-socking“ treatment we are facing another game change in the treatment of incompetent saphenous veins. Since its introduction to Europe in September 2011 the Saphen VenaSeal technology has found its way into the scientific literature at its highest level.

We look forward to live surgery, presentation of clinical experience of VenaSeal users and discussion of the latest clinical studies with an highly interested audience.

Yours sincerely

Prof. Dr. Thomas M. Proebstle

Scientific Program

Time: Saturday 26th January, 2013, 10:00 am – 2:00 pm
Location: Lecture Hall, Dept. of Dermatology, Langenbeckstraße 1, 55131 Mainz

09:00 am Arrival – Registration - Coffee

Chairmen: Thomas Proebstle, Jens Alm

10:00 am Opening remarks
Thomas Proebstle

10:05 am The History and Development of an Endovenous Cyanoacrylate Adhesive
Rod Raabe

10:45 am Live-Surgery transmission to lecture Hall
Thomas Proebstle, Bettina Kleis-Fischer

11:30 am Coffe-Break, Snack

12:00 pm Clinical Results and Indications for Endovenous Cyanoacrylate Adhesive
Jens Alm

12:30 pm Physician´s Marketing and Sales for Cyanoacrylate Adhesive - Clinical result
Ulf Zierau

01:00 pm Review of current studies on Endovenous Cyanoacrylate Ablation
Thomas Proebstle

01:30 pm Panel Discussion – Questions from the Audience
Raabe, Alm, Zierau, Proebstle

02:00 am Closing Remarks
Thomas Proebstle

Participation is free of charge
