2nd International Symposium on Endovenous Treatment with Cyanoacrylate Adhesive

Dear colleagues,

for the second time we will meet at Mainz University to discuss the latest developments in Cyanoacrylate embolization of incompetent veins

Backed up with a paper in the field's leading Journal, JVS V&L, with a Gold Award at the UIP meeting in Boston and a fully enrolled FDA-IDE trial we will discuss two years of routine treatment in Europe with this novel „no-tumescent-no-compression-socking“ technology.

We look forward to live surgery, presentation of clinical experience of VenaSeal users and discussion of the latest clinical studies with an highly interested audience.

Yours sincerely

Prof. Dr. Thomas M. Proebstle
Program Chair
