

Dear members of the JUGGLE network,
Dear scientists at JGU and UMCM,

We herewith cordially invite you to join an in-house seminar of the *Deutscher Hochschulverband (DHV)*, which has been organized and financed by the JUGGLE network of junior group leaders at JGU and UMC Mainz. The seminar will inform participants about the current legal position of the so-called *Wissenschaftszeitvertragsgesetz (WissZeitVG)*, the German law that regulates fixed term contracts in academia, i.e. science and research in Germany. As you will probably all know, German regulations do currently not allow researchers (and similarly, clinicians) to be employed for longer than 12 or 15 years. The talk will be given by a DHV corporate attorney and will inform about regulations applying to the known 12-years rule, guidelines concerning working contracts based on third party funding, exceptions and period extension due to child care and further potential perspectives. The talk will be given in German, but you are also invited to discuss in English of course.

Title of the talk: Aktuelle Rechtslage zum Wissenschaftszeitvertragsgesetz
When: September 23rd, 2014, starting at 11 a.m. (will probably last 2 – 2.5h)
Where: Hörsaal Chirurgie, Building 505H at University Medical Center campus
Registration: Please register to this event until Tuesday September 9th by sending an email to juggle@uni-mainz.de and be sure to have "DHV registration" in the subject line of your email. Please list your name, institution and current career stage (PhD student; postdoc; group leader; prof.;...).
Costs: costs are covered by the JUGGLE network, no extra-fee applies

Further Information:
