wolfgang.weninger@sydney.edu.au

Head of Immune Imaging Program  
Assistant Director  
Professor and Head Immune Imaging Program  
Centenary Institute

**Additional Roles:**

Raymond E. Purves Professor  
Discipline of Dermatology  
Sydney Medical School

**Head**

Department of Dermatology  
Royal Prince Alfred Hospital

Professor Weninger is a preeminent clinician scientist in the fields of dermatology and immunology. At the Centenary Institute, he leads the Immune Imaging Program. He is the Raymond E Purves Chair of Dermatology at the University of Sydney and heads the Department of Dermatology at Royal Prince Alfred Hospital, and also. Professor Weninger is a pioneer in the uncovering of immune cell behaviour during anti-pathogen and anti-tumour immune responses in the skin using intravital imaging technology. He is recognised for discovering several unique immune cell subsets and determining their function in the context of immune-mediated pathology. His ongoing work is aimed at understanding the mechanisms underlying skin allergies, and the pathways resulting in successful immunity against skin infections as well as melanoma.

**Academic Education**

1991 Dr. med, Medizin-Universität Wien  
1996 Facharztanerkennung - Vorstand für Dermatologie und Venerologie  
1998 Medical License
